Driving the Next Chapter of India's Logistics: Smart, Integrated, and Sustainable

For the first time in India, the 47-year transport logistic platform brings its global strategic summit to Mumbai—uniting leadership across sea, rail, road, warehousing, policy, regulation, digital transformation, and sustainability. Built on the global benchmark set by transport logistic Munich, transport logistic India 2026 is where the nation's logistics performance agenda takes flight.

The TLI 2026 conference is a thought leadership endeavour with a spotlight on India, where policy action on logistics indices meets business excellence. The program looks at how a focus on infrastructure development is improving manufacturing competitiveness; logistics performance drives manufacturing excellence; innovation scripts new-age freight carriage experiences; and the role of specialised solution providers in managing hazardous, oversized & time-sensitive supply chains.

We are living in interesting times indeed. With geopolitical uncertainty recalibrating age-old manufacturing footprints, business continuity is looking intently at diversification of manufacturer supply chains. Geopolitical unrest aside, several demand-side factors, such as natural & manmade calamities, ecommerce adoption, shipper friend-shoring & near-shoring strategies, rapid infrastructure development, and a growing breed of eco-conscious customers, are sparking a not-seen-before evolution in freight carriage delivery & performance.

Join us as we examine how logistics, technology, & warehousing solution providers can gain by retrofitting operations and how shipper supply chain leaderships need to deploy data, technology & green practices in a fraught global climate demanding adaptability & resilience.

The transport logistic India 2026 Conference, co-located with the transport logistics India 2026 Exhibition, is a marketplace offering service providers a not-to-be-missed opportunity to rub shoulders with supply chain, transformation, logistics, operations, procurement, cyber security, data analytics, business continuity, & innovation leaderships running the gamut of manufacturer brands.

Theme: Powering Vision 2030 with logistics performance excellence

How the National Logistics Policy complements the PM GatiShakti National Master Plan – Transforming Indian freight carriage experience

To discuss how the National Logistics Policy & PM GatiShakti National Master Plan together are reshaping manufacturing competitiveness. The session will highlight how integrated infrastructure, digital governance and process efficiencies are reducing logistics costs, boosting intermodal share, India's LPI ranking and strengthening India's global competitiveness.

Providing thrust to India's logistics competitiveness – Role of MMLP network

A deep dive into how the MMLP network is redefining cargo aggregation, distribution and modal balance. Leaders will examine how this model cuts transit times, lowers freight costs and eases congestion through targeted infrastructure interventions.

Prioritising manufacturing competitiveness through logistics infrastructure development – A look at India's Dedicated Freight Corridor Program

A high-level discussion on how the DFCs, integrated with Indian Railways, are unlocking faster transit, higher productivity and lower unit costs. The conversation will link DFC-driven efficiencies to improved manufacturing competitiveness, higher rail freight share and measurable sustainability gains.

Casting the spotlight on future trends in smart warehousing

Future-proofing operations by exploring how automation, IoT, AI and advanced storage systems are transforming warehousing accuracy, speed and cost. Leaders will discuss adoption challenges, SME readiness, tech selection and the next wave of innovation shaping India's warehouse ecosystem.

DAY 2 - Key Discussion Topics

Role of superior logistics performance in pivoting India as a manufacturing excellence destination

Why a consistently improving Logistics Performance Index (LPI) is critical to the success of the 'Make in India' mission. This session outlines the policy measures and strategic investments required to attract global capital, and captures transporter and shipper sentiments on India's ascent as a dependable global production base.

Charting a technology roadmap for Indian logistics sector – A future vision

A forward-looking session on industry-defining technologies that will reshape freight from factory to doorstep. From predictive analytics to automation and platformisation, this discussion focuses on how startups and enterprise innovation are shifting logistics from instinct-driven to data-driven operations.

Excellence in transport operations – Role of innovation, multimodal integration, policy action & regulation

Analyse India's progress since the launch of the National Logistics Policy. The session covers best practices in multimodal operations, the impact of key GOI's infrastructure programs (MMLPs, DFCs, ports), and the strategic investments required in technology, sustainability and workforce capabilities.

Movement of bulk liquid logistics – Strategic responses of multimodal, technology, & shipper leaderships

To discuss the specialized challenges and best practices in the transportation and handling of hazardous, inflammable liquid, and gaseous cargo. Focus on design innovation in tank containers, carriers and terminals to ensure safety, regulatory compliance and maximum transfer efficiency.

Excellence in heavy and oversized cargo handling & transport – Role of specialized logistics solution providers

Examining the critical role of specialized Oversized and Heavy Lift (OSHL) providers in managing complex, high-value project logistics. Discuss industry best practices in route and risk planning, and addressing shipper demands for seamless, integrated OSHL transit solutions.

Understanding agri-logistics - Where timing is everything

Explore how time-sensitive agricultural supply chains demand atypical solutions. Explore best practices in cold chain technology and contingency planning for perishables and frozen goods, and the strategic management of seasonality to maximize shipper value and secure consumer quality. Innovation insights to optimise supply chains for time critical products and trends shaping the future of this sector.

DAY 3 - Key Discussion Topics

Building new-age digital trade corridors – Constructing robust cross-border logistics processes

The strategic importance of creating reliable, transparent, and traceable cross-border logistics processes to achieve India's merchandise export target. Examine carrier best practices, innovation in customs clearance and trans-national procedural harmonization, driven by evolving global demand factors.

Carbon neutrality in supply chains: Role of EVs, alt-fuels & corporate carbon offset strategies

A conversation on how EV adoption, alternative fuels, and carbon offset strategies are shaping corporate India's decarbonisation roadmap. The session examines cost viability, operational impact and the design of credible, future-ready green supply chains.

Closing Plenary: Industry vision – India's march towards logistics performance excellence

A forward-looking dialogue on the policy, infrastructure, innovation and sustainability priorities that will elevate India's logistics performance. Understanding transporters and shippers' perspectives on how performance indices will shape India's rise as a global manufacturing and logistics powerhouse.

transport logistic India 2026 Conference National Advisory Committee (NAC)

Strategically guided by industry, transport logistic India's National Advisory Committee (NAC) brings together board-level decision makers from India's most logistics-intensive sectors and major supply chain operators encompassing top demand-side businesses, including major manufacturers from pharmaceuticals, infrastructure, large-scale retailers, industrial conglomerates and supply chain operators.

Their mandate:

Shape a Future-Proof Agenda: Ensure every session is strategically relevant to the industry's most critical challenges and emerging trends.

Amplify High-Level Participation: Facilitate the attendance of board level decision makers, senior executives and key government officials.

Translate Insight into Investment: Deliver crucial policy insights and facilitate connections that drive long-term business partnerships and sustained growth.

The National Advisory Committee (NAC)

Mr. Sanjay Bhatia, IAS (Retd.),
Former UpaLokayukta, Maharashtra State,
& Chairperson, transport logistic India 2026 National Advisory Committee

Ms. Aditi Sharma
President and chief manufacturing
excellence Officer,
UNO Minda

Mr. Ajay Gade
Deputy General Manager – Hydrogen Value Chain,
Cement & Steel Procurement,
Reliance Industries

Mr. Ajay Singh
Chief Supply Chain Officer
and Vice President,
Hindustan Platinum

Mr. Amartyaa Kumar Guha
Head of India Operations,
ZEISS India

Mr. Amritendu Mukherjee
Vice President & Head Global Logistics,
Dr. Reddy's Laboratories Ltd.

Mr. Arun Saravanakumar
Director – Supply Chain,
L'Oréal India

Mr. Chandrakant Kadam
Head - Services and Indirect Material
Sourcing and International Logistics
Mahindra and Mahindra Limited
[Automotive & Farm Equipment Business]

Mr. Chetan Thakar
Head Supply Chain Management,
PETRONAS Lubricants International

Mr. D. K. Rama Swamy
Associate Vice President MCD.II,
Bharat Forge

The National Advisory Committee (NAC)

Mr. Devidas Ganage
Head Logistics & Supply Chain,
Brilliant Polymers Pvt. Ltd.

Mr. Gopinath Phargade
Head-Logistics
Air Products India

Mr. Kailas Vispute
Head of Supply Chain EV Mobility
Tata Motors Smart City Mobility Solutions

Mr. Kishor Sankhe
Vice President – Supply Chain Management
and Production Planning & Control,
Mahindra & Mahindra (Automotive division)

Mr. Pratim Dutta
Head Supply Chain & Logistics,
Jindal Steel & Power Ltd.

Mr. Rahul Ligade
Senior Vice President-
Supply Chain & Commercial,
JSW Paints Private Limited

Mr. Rajinder Singh Maan
General Manager -
Supply Chain Management,
R.A.K Ceramics India Private Limited

Ms. Rajni Gupta
Country Head
Agristo India

Dr. Ravi Prakash Mathur
Head Global Freight and Projects,
Apollo Tyres Ltd.

Mr. Rayapati Srinath Reddy
Head – Sales & Operations Planning
United Breweries Ltd.

Mr. Sanjoy Bhadra
GM SCM & Export,
BC Jindal Group

Mr. Santosh Ghawale
Associate Vice President - Logistics,
Nandan Petrochem Limited

Ms. Sheetal Sharad
Chief Ratings Officer,
ICRA ESG Ratings

Mr. Sreenivas Rao Nandigam
Senior Vice President –
Head Global Supply Chain,
Sun Pharmaceutical Industries Ltd.

Mr. Sudeep Sarcar
CEO,
India Exposition Mart Ltd.

Mr. Vaibhav Sarin
DGM International Logistics,
Varun Beverages Limited

Why you should Attend?

The transport logistic India's 2026 Conference is designed to deliver measurable outcomes that position your business at the forefront of the industry. Attending is your direct route to:

01

See what's next, first

Access cutting-edge logistics tech, network design playbooks, and real-world case studies curated for India's scale.

02

Shape policy, not just react to it:

Engage directly with key government and regulatory bodies on corridors, standards, decarbonization, and incentives.

03

Build partnerships that move the needle:

Meet shippers, carriers, 3PLs, ports, airport/rail/road operators, warehousing leaders & tech disruptors—end-to-end.

04

Benchmark with the best:

Learn from global and regional leaders on cost-to-serve, OTIF, carbon intensity, and capital productivity.

05

Solve live supply chain pain points:

From congestion & demand variability to data silos & cross-border complexity—walk away with implementable solutions.

06

De-risk growth & investment:

Gain exclusive market insights and forecasts to inform capex, network expansion, ESG roadmaps, and digitization priorities.
